## E-Z Clip™ Aluminum Lifesaver™ Fitting

For Aluminum A/C Line Repair when used  
with Aeroquip GH134 Hose  
Innovation Sheet

### A/C Hose Repair System

The Aluminum Lifesaver braze fitting is designed to rework failed OEM aluminum air conditioning tubing and hose assemblies in sizes 10mm to 18mm (metric tubing only, -6 to -12). This repair system allows the installer to reuse unique OEM terminal connections, while replacing the failed OEM hose and nipple with the E-Z Clip attachment system.

**NOTE:** The E-Z Clip system can only be used with Aeroquip GH134 hose.

#### Features

- Ability to reuse unique OEM terminal connections
- Simple “pliers-type” tool for installation
- Superior performance equal to an OEM factory crimp hose assembly
- Braze-on type aluminum nipple
- GH134, multi-refrigerant compatible hose

#### Benefits

- Minimizes downtime and costly repairs associated with the purchase of new A/C assemblies
- Error free, hose-to-fitting connections are made offering the customer a virtually leak-free assembly, with no-power tools required
- Provides the end-user with a proven high-quality replacement A/C hose and fitting design
- The Aluminum Braze-on nipple is the same patented profile as the steel E-Z Clip fitting program, and delivers the best performance of any field assembly product available on the market today
- Works with R12, R134a and other EPA “Snap” Approved Refrigerants

## E-Z to use

Each kit contains the correct components for replacement of a single hose assembly. Aeroquip GH134 hose must be ordered or purchased separately.

Determine tube OD for Hose ID per chart below:

### STANDARD CONFIGURATIONS

Size *	Tube OD mm (in)	Hose ID mm (in)	Hose Part Number	Use Lifesaver Kit Part Number
-6	10 (.39)	8 (.32)	GH134-6	FF13727-6
